

BSC Training Course: Advanced Performance Analysis and Tools

Objectives

The objective of this course is to learn how *Paraver* and *Dimemas* tools can be used to analyze the performance of parallel applications and to familiarize with the tools usage as well as instrumenting applications with *Extrae*.

Requirements

Prerequisites:

Good knowledge of C/C++

Basic knowledge of MPI, OpenMP

NOTE:

MIRI students interested in obtaining the Statement of Participation will have to submit some exercises. Further information will be provided on the first course day.

Learning Outcomes

The students who finish this course will have a basic knowledge on the usage of the BSC performance tools. They will be able to apply the same methodology to their applications, identifying potential bottlenecks and getting hints on how to improve the applications performance

Academic Staff

Course Convener: Judit Gimenez, Performance Tools Group Manager, Computer Science, BSC

David Bernal Soto, Performance Tools Group Manager, Computer Science, BSC

Lau Mercadal, Performance Tools, Computer Sciences, BSC

Germán Llort, Performance Tools, Computer Sciences, BSC
