Inici > BSC Training: Research Data Management for Advanced Users (Follow-up Session)

BSC Training: Research Data Management for Advanced Users (Follow-up Session)

Objectives

- Provide participants the opportunity to share their experiences applying concepts learned during the training.
- Clarify and expand on advanced topics covered during the course
- Foster an interactive discussion with trainers and peers to exchange best practices and lessons learned.
- Identify gaps or additional needs for future training sessions or resources.

Requirements

Attendance at the original Research Data Management for Advanced Users training

Learning Outcomes

By the end of this follow-up session, participants will:

- Gain insights from peers and trainers on how to overcome common challenges in research data management.
- Have a clearer understanding of how to apply the advanced principles and methods from the training in their own research projects.
- Identify needs for additional support or resources in data management.

Academic Staff

Course convener: Nadia Tonello, Head of Data Management Group, Operations, BSC
Lecturers: Data Management group members, Network and Security group members, Data Protection Officer, Life Science data managers, Earth Science data managers, BSC

- Nadia Tonello, BSC Operations Dept, Head of Data Management
- Cristian Castro, BSC Operations Dept, Data Manager

- Maria Bilbao, BSC Data Protection Officer, Lawyer and certified DPO
- Fernando López, BSC Operations Dept, Network and Security, Systems administrator and security engineer
- Laura Portell, Life Sciences Dept, INB/ELIXIR-ES coordination node, Research engineer
- Nadir Mitjans, Innovation and Business development, Technology Tranfer officer
- Alberto Labarga, Life Sciences Dept, INB/ELIXIR-ES coordination node, Senior Research engineer
- Eva Martín del Pico, Life Sciences Dept, INB/ELIXIR-ES coordination node, First stage researcher

Barcelona Supercomputing Center - Centro Nacional de Supercomputación
