Get CA Certificate

In order for the server to "trust" certificates generated through *pkIRISGrid* they must have the Certificate Authority (CA) root certificate installed.

Download the file [IRISGridCA.der](#) from Microsoft Internet Explorer and click on "Abrir".

Click on "Instalar certificado ...".

Click on “*Siguiente*”.

Select “*Colocar todos los certificados en el siguiente almacén:*” option and click on “*Examinar*”.

Click on “*Siguiente*”.

Click on “*Finalizar*”.

Click on "Sí".

Finally, click on "Finalizar".

Configuring Windows 7 supplicant

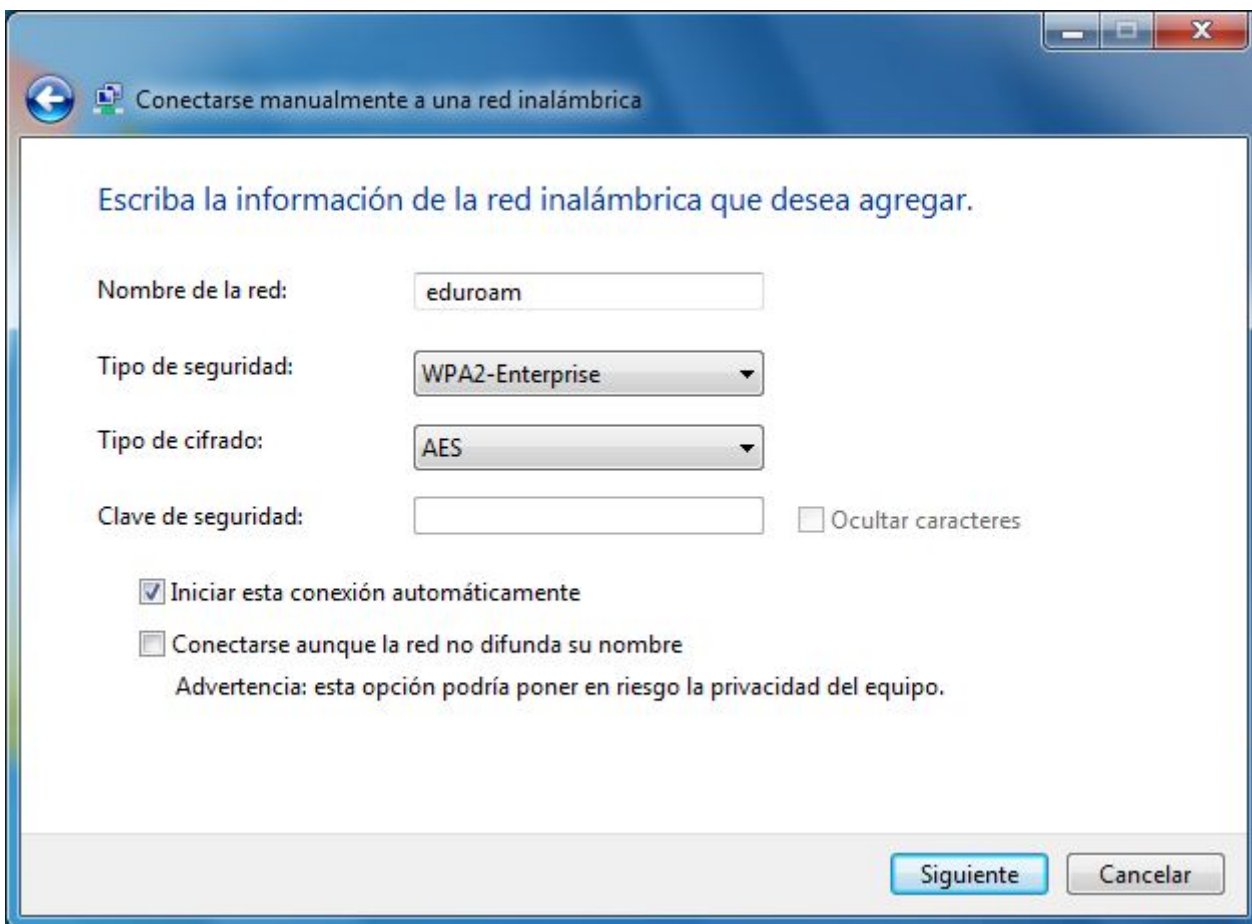

Go to "Control Panel -> All Control Panel Items -> Network and Sharing Center" and choose "Set up a new connection or network"

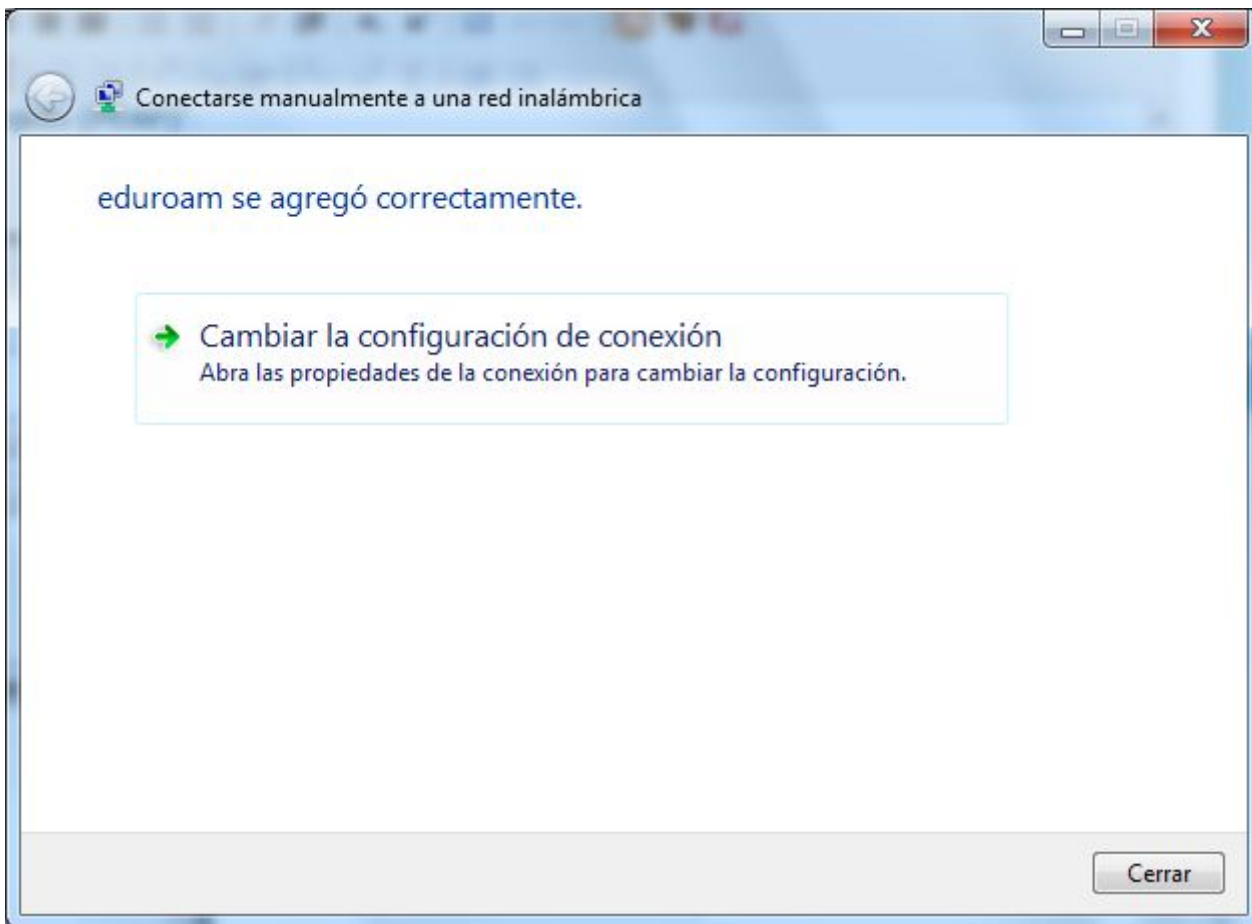

Choose "Manually connect to a wireless network" and click on "Next".

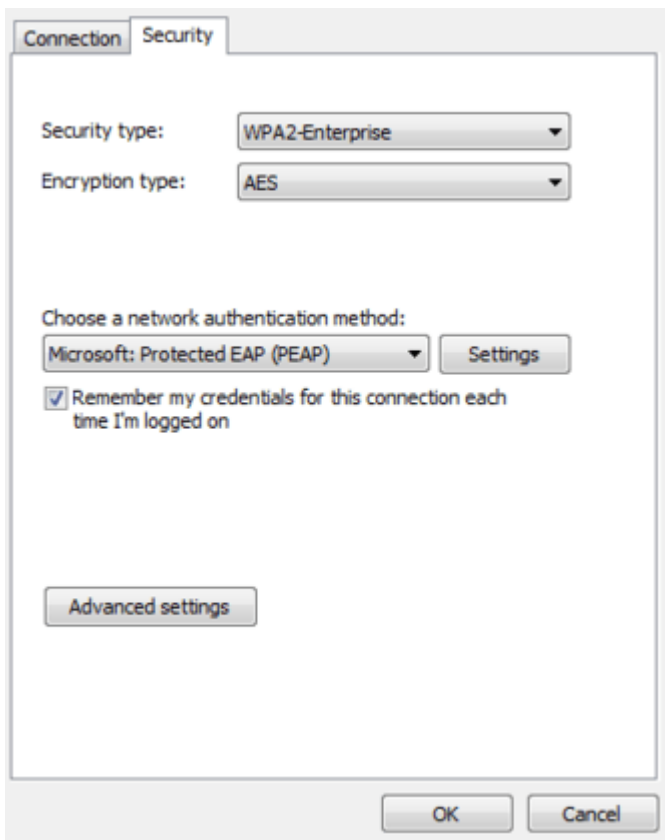

Enter "eduroam" for "Network Name" and click on "Next".

Click on "Change connection settings".

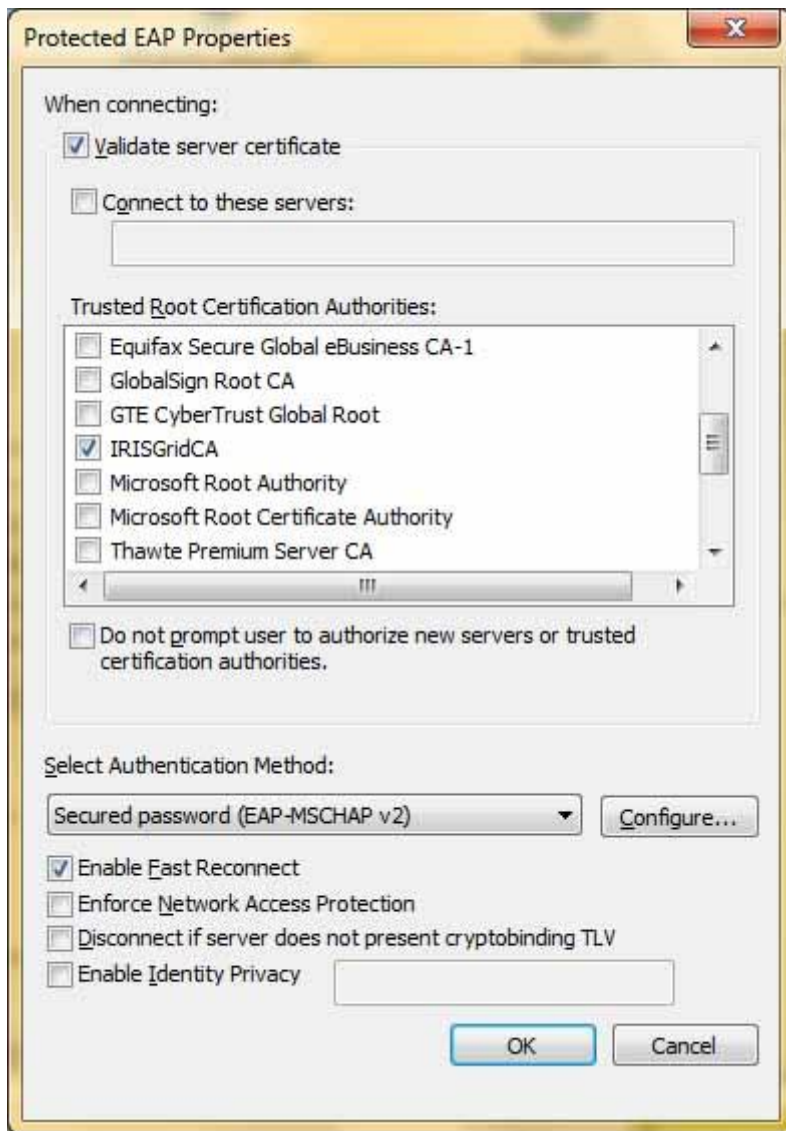

In the “*Security*” tab, select “*WPA2-Enterprise*” for the “*Security type*”, select “*AES*” for “*Encryption type*”, choose “*EAP protegido (PEAP)*” for “*Tipo de EAP*” and click on “*Settings*”.

In the “*Protected EAP Properties*” window, select “*Validate server certificate*”, check “*IRISGridCA*” for “*Trusted Root Certification Authorities*”, and choose “*Secured password (EAP-MSCHAP v2)*” for “*Select Authentication Method*”

”. Then click on “*Configure*”.

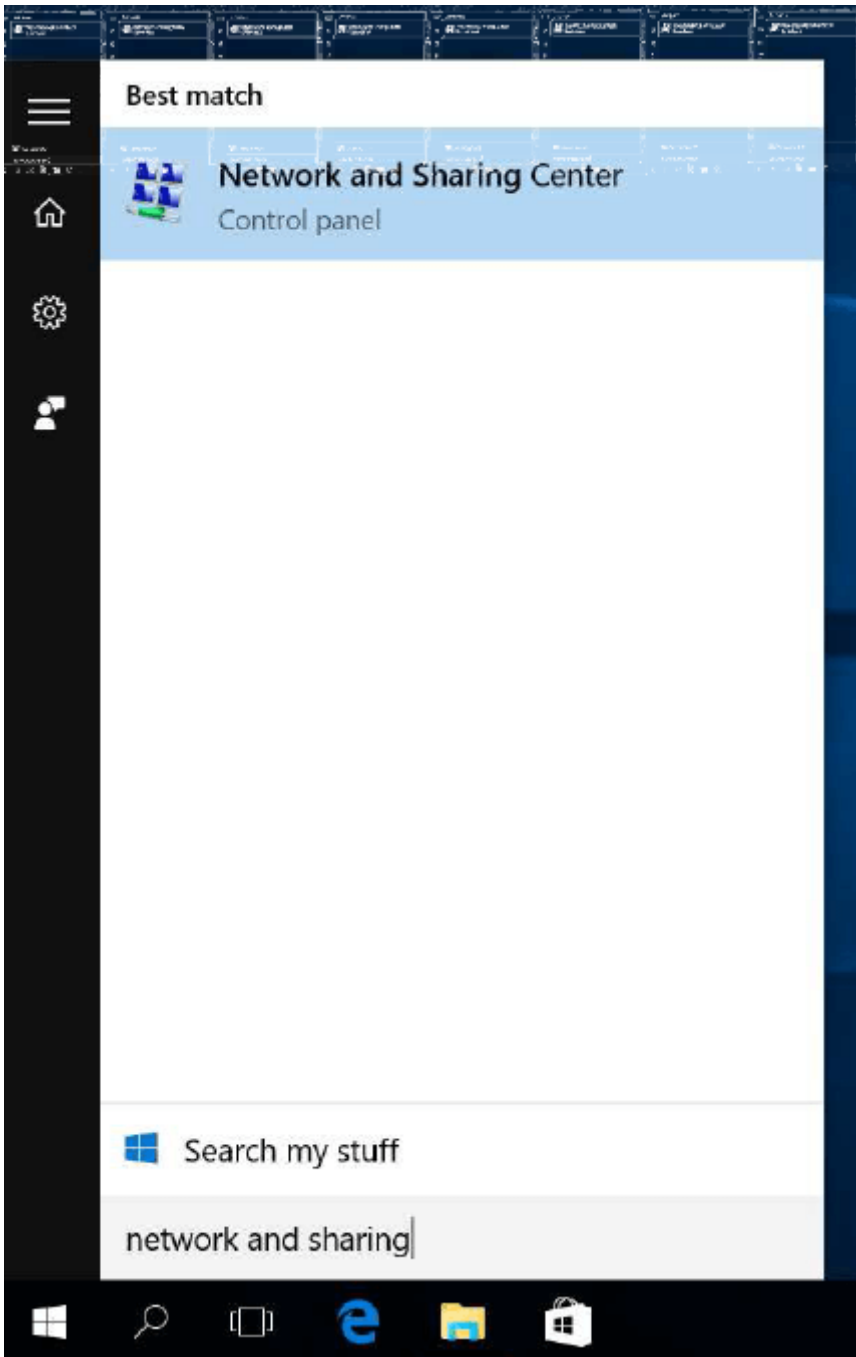

Finally, in the “*EAP MSCHAPv2 Properties*” window, unselect “*Automatically use my Windows logon name and password (and domain if any).*”

Configuring Windows 10

Go to start menu and then type “Network and Sharing Center”

Choose "Set up a new connection or network"

Network and Sharing Center

← → ▾ ↑  « Network and Internet » Network and Sharing Center

[Control Panel Home](#)
