Research Topic

Advanced HPC-based Computational Modeling in Biomechanics and Systems Biology

[Frontiers Journal](#) has introduced a new research topic: [Advanced HPC-based Computational Modeling in Biomechanics and Systems Biology](#). This research topic should contribute to bridging the gap between Computational Biomechanics and Systems Biology, with HPC-based Computational Modeling as the link.

The topic is co-edited by Mariano Vázquez, Peter V Coveney, Alfons Hoekstra, and Bastien Chopard from CompBioMed. These concepts are in the core of the European Center of Excellence in Computational Biomedicine ([CompBioMed](#)).

BSC encourages researchers to submit their papers. Submission Deadlines: 31 March 2017 for abstracts and 30 September 2017 for manuscripts.
