

## **EUCRA\_ Service: Service contract between EEA and ETC CA**

### **Description**

This contract will aim at carrying out the European Climate Risk Assessment (EUCRA). The primary policy purposes of EUCRA are: " to support the identification of adaptation-related policy priorities for the next European Commission (to be nominated in 2024)," to support the prioritization of adaptation-related investments for the following multi-annual financial framework (MFF) of the European Union," to support EU policy development in climate-sensitive sectors," to provide an EU-wide point of reference for conducting and updating national or subnational climate risk assessments.

EUCRA will comprise the following products:" an EEA report," an Executive Summary, and" complementary products, such as an interactive viewer and policy briefs.
