STIMULI: EcoSysTem Hub for the promotion of hIgh perforMance compUting cloud-based modeLling and sImulation services

Description

STIMULI project aims at developing a feasibility study for the creation of a Catalan hub that will promote the use of advanced ICT in SMEs in order to stimulate the uptake of HPC cloud-based modelling and simulation services, thus increasing the SMEs competitiveness and fostering regional growth.

This feasibility study will be focused on creating an Innovation Ecosystem by bringing together the regional stakeholders (RTOs, government, companies, mainly SMEs, ICT and manufacturing networks, R&D institutions and trade associations, among others), through giving access to HPC cloud resources in a collaborative model by the Internet.”
