

[Anomalous growth of dislocation density in titanium during recovery](#)

URL: <https://www.sciencedirect.com/science/article/pii/S2352492823009893>

Authors: [Ivanov, Ivan](#) / [Gutiérrez-Moreno, Julio](#) / [Emurlaev, Kemal](#) / [Lazurenko, Daria](#) / [Bataev, Ivan](#)

Research Lines: [Ab-Initio Electronic Structure Methods](#)

Publication: Materials Today Communications

Place Published: Elsevier

Volume / Pagination: 35 / 106298

Paraules clau: [Dislocation dynamics](#), [Dislocation reactions](#), [Molecular dynamics](#), [Recovery](#), [synchrotron X-ray diffraction](#)
