

## [A high-performance electromagnetic code to simulate high-temperature superconductors](#)

**URL:** <https://www.sciencedirect.com/science/article/pii/S0920379624001352>

**Authors:** [Soba, Alejandro](#) / [Fernandez-Serracanta, O](#) / [Lorenzo, J](#) / [Garcín, D](#) / [Houzeaux, Guillaume](#) / [Lamas, N](#) / [Granados, X](#) / [Mantsinen, Mervi](#)

**Research Lines:** [Computational Modeling for Fusion](#)

**Publication:** Fusion Engineering and Design

**Volume / Pagination:** 201 / 114282

**Paraules clau:** [Finite element analysis](#), [Fusion magnets](#), [H formulation](#), [high-performance computing](#), [High-temperature superconductivity](#)
