

Land CSEM Simulations and Experimental Test Using Metallic Casing in a Geothermal Exploration Context: Vallès Basin (NE Spain) Case Study

URL: <https://ieeexplore.ieee.org/document/9394801>

Authors: [Castillo-Reyes, Octavio](#) / [Queralt, Pilar](#) / [Marcuello, Alex](#) / [Ledo, Juanjo](#)

Research Lines: [Electromagnetic Modeling and Inversion](#) / [HPC Geophysical Applications](#) / [Numerical Methods](#)

Publication: IEEE Transactions on Geoscience and Remote Sensing

Place Published: IEEE Transactions on Geoscience and Remote Sensing

Paraules clau: [Controlled-source electromagnetic \(CSEM\)](#), [geothermal exploration](#), [high-performance computing \(HPC\)](#), [metallic casing effects](#), [numerical modeling](#)
