

24th ACCENT/GLOREAM Workshop

Objectives

The aim of **ACCENT/GLOREAM** is to investigate the processes and phenomena which determine the chemical composition of the troposphere by means of advanced and integrated modelling, both on regional (over Europe) and global scale. The workshop takes place in the framework of **ACCENT** (Atmospheric Composition Change - The European Network of Excellence). The general aim of the workshop, a follow-up of the EUROTRAC-GLOREAM/EURASAP workshops, is to present and discuss results concerning recent developments in tropospheric chemical transport modelling.
