

General Earth Sciences

Objectives

The Earth Sciences Department of BSC-CNS has the aim of modelling and understanding the behaviour of the Earth System, focusing its research activities on atmospheric processes and climate change modelling.

The strategic plan is available [here](#)

We invite you to see the department leaflets:

- [Atmospheric Composition](#)
- [Climate Prediction](#)
- [Computational Earth Sciences](#)
- [Earth System Services](#)

Barcelona Supercomputing Center - Centro Nacional de Supercomputación
