About BSC

The Barcelona Supercomputing Center - Centro Nacional de Supercomputación (BSC-CNS) is the leading supercomputing center in Spain. It houses MareNostrum, one of the most powerful supercomputers in Europe, was a founding and hosting member of the former European HPC infrastructure PRACE (Partnership for Advanced Computing in Europe), and is now hosting entity for EuroHPC JU, the Joint Undertaking that leads large-scale investments and HPC provision in Europe. The mission of BSC is to research, develop and manage information technologies in order to facilitate scientific progress. BSC combines HPC service provision and R&D into both computer and computational science (life, earth and engineering sciences) under one roof, and currently has over 1000 staff from 60 countries.

Look at the BSC experience:

We are particularly interested for this role in the strengths and lived experiences of women and underrepresented groups to help us avoid perpetuating biases and oversights in science and IT research. In instances of equal merit, the incorporation of the under-represented sex will be favoured.

We promote Equity, Diversity and Inclusion, fostering an environment where each and every one of us is appreciated for who we are, regardless of our differences.

If you consider that you do not meet all the requirements, we encourage you to continue applying for the job offer. We value diversity of experiences and skills, and you could bring unique perspectives to our team.

Context And Mission

The System Tools and Advanced Runtimes (STAR) group is a cutting-edge computer systems research team focused on innovating across multiple layers of the system software stack—from operating systems, runtimes, and low-level APIs to programming models, tools, and applications. Our mission is to enhance system software to support increasingly complex workloads—including traditional HPC and emerging AI workloads—on massively parallel HPC and cloud platforms.

We are seeking a PhD student (R1) to contribute to research and development on runtime extensions to support interoperable task-aware libraries and coroutines. The ideal candidate will be passionate about system software, parallel runtime systems, and interoperability mechanisms for high-performance computing. We welcome motivated and talented researchers, with or without prior experience, with a strong interest in these areas.

Key Duties

- Design and implement runtime extensions to enhance hierarchical scheduling
- Develop and evaluate novel scheduling and execution mechanisms within runtime systems to improve efficiency and adaptability for high-performance computing workloads.
- Collaborate with researchers and developers to integrate and validate these runtime extensions within real-world HPC applications and programming environments.

Requirements

- Education
 - Master's degree in Computer Science, Computer Engineering, or a related field.
- Essential Knowledge and Professional Experience
 - Proficiency in C/C++ programming and strong software development skills.
 - Experience with runtime systems, scheduling, or task-based programming models.
- Competences
 - Strong problem-solving skills and the ability to conduct independent research.
 - Ability to work effectively both independently and as part of a collaborative research team.
 - Strong initiative and organizational skills, with the ability to manage tasks and meet deadlines.

Conditions

- The position will be located at BSC within the Computer Sciences Department
- We offer a full-time contract (37.5h/week), a good working environment, a highly stimulating environment with state-of-the-art infrastructure, flexible working hours, extensive training plan, restaurant tickets, private health insurance, support to the relocation procedures
- Duration: Open-ended contract due to technical and scientific activities linked to the project and budget duration
- Holidays: 23 paid vacation days plus 24th and 31st of December per our collective agreement
- Salary: we offer a competitive salary commensurate with the qualifications and experience of the candidate and according to the cost of living in Barcelona
- Starting date: 01/04/2025

Applications procedure and process

All applications must be submitted via the BSC website and contain:

- A full CV in English including contact details
- A cover/motivation letter with a statement of interest in English, clearly specifying for which specific area and topics the applicant wishes to be considered. Additionally, two references for further contacts must be included. Applications without this document will not be considered.

Development of the recruitment process

The selection will be carried out through a competitive examination system ("Concurso-Oposición"). The recruitment process consists of two phases:

- **Curriculum Analysis:** Evaluation of previous experience and/or scientific history, degree, training, and other professional information relevant to the position. - **40 points**
- **Interview phase:** The highest-rated candidates at the curriculum level will be invited to the interview phase, conducted by the corresponding department and Human Resources. In this phase, technical competencies, knowledge, skills, and professional experience related to the position, as well as the required personal competencies, will be evaluated. - **60 points**. *A minimum of 30 points out of 60 must be obtained to be eligible for the position.*

The recruitment panel will be composed of at least three people, ensuring at least 25% representation of women.

In accordance with OTM-R principles, a gender-balanced recruitment panel is formed for each vacancy at the beginning of the process. After reviewing the content of the applications, the panel will begin the interviews, with at least one technical and one administrative interview. At a minimum, a personality questionnaire as well as a technical exercise will be conducted during the process.

The panel will make a final decision, and all individuals who participated in the interview phase will receive feedback with details on the acceptance or rejection of their profile.

At BSC, we seek continuous improvement in our recruitment processes. For any suggestions or comments/complaints about our recruitment processes, please contact
