

## [The BSC film \*Simulados\*, shortlisted at Imagine Science Film Festival](#)

The BSC Visualization team has been shortlisted at the well-known [Imagine Science Film Festival](#) taking place October 14 – 21, 2016 in New York. The film [Simulados](#) will be screened next 16 October at the [New York Hall of Science](#) in the Science for Nanos shorts category.

One of the shortfilm's directors, Guillermo Marín, will also participate in [the Science Futures: Talks & Reception](#) panel talking about the work of the BSC Visualization team.

This is the second consecutive year that the BSC Visualization team is shortlisted at this festival. [Last year](#), the festival selected the short documentary [Sniff](#).

### **About *Simulados***

*Simulados* is the story of a hunter-gatherer from 12000 years ago trying to survive in one of the most extreme climates in the world. In their journey we'll learn how computer simulations help us understand the workings of our societies, and how they might help us face the consequences of complex challenges such as climate change.

### **About Imagine Science Film Festival**

Founded in 2008 with the mission of bridging the gap between arts and sciences through filmmaking, Imagine Science Films encourages collaboration between scientists, who dedicate their lives to studying the world in which we live, and filmmakers, who interpret and convey this knowledge, to make science

accessible and stimulating to the broadest possible audience. It is ISF's vision that the way science is portrayed in the media will be artful, compelling, and accessible to all. ISF produces the annual Imagine Science Film Festival in New York to showcase short and feature length films of all genres that explore scientific concepts in compelling ways. In February 2015, the Imagine Science Film Festival Abu Dhabi was inaugurated in partnership with NYU Abu Dhabi, and 2016 saw the first edition of Imagine Science Film Festival Paris.
