

ETC-CA: European Topic Centre on Climate Change Adaptation and LULUCF 2022-2026

Description

The ETC CA works to assist the European Environment Agency by informing and supporting EU policy processes and their developments, especially the EU Adaptation Strategy, by providing relevant information, improving the existing knowledge base and assisting member countries in the areas of climate change impacts, vulnerability, adaptation and Land Use, Land-Use Change and Forestry (LULUCF). The ETC CA will supply specific technical and scientific expertise and the knowledge needed for data handling and analysis, thematic, integrated and systemic assessments, and will communicate the status and trends of the environment in European states in regards to climate change impacts, vulnerability, adaptation (CCIVA) and LULUCF.
