

STARS: Supercomputing And Related applications Fellows Programme

Description

The BSC STARS (Supercomputing And Related applications) International Research Fellows program aims at fostering the training of highly skilled post-doc in all fields of High Performance Computing and related applications, specifically in Earth Science and Meteorology, in Life Sciences, Genomics and Personalised Medicine and in Computational Engineering and Physics and Computational Societies, providing them with all the necessary tools for developing their potentials, deepening their skills and knowledge in a stimulating, international and interdisciplinary environment, offering them intersectorial secondments with private industry or non-academic Research centers, in order to boost their career perspectives as successful independent researchers.
