

[AI-Driven UAV and IoT Traffic Optimization: Large Language Models for Congestion and Emission Reduction in Smart Cities](#)

URL: <https://www.mdpi.com/2504-446X/9/4/248>

Authors: [Moraga, Álvaro](#) / [de Curtò, J](#) / [de Zarzà, I](#) / [Calafate, Carlos](#)

Research Lines: [Cyber-Physical Computing Systems](#) / [Industrial artificial intelligence and digital twins](#) / [Internet of Things and Stream Processing](#) / [Smart and resilient cities](#) / [Urban Data Science](#)

Publication: Drones

Place Published: MDPI

Volume / Number / Pagination: 9 / 4 / 248

Palabras clave: [AI-driven traffic control](#), [CO2 emission reduction](#), [drone-assisted traffic management](#), [IoT](#), [Large Language Models](#), [Smart mobility](#), [SUMO](#), [traffic optimization](#), [UAV](#), [urban congestion](#)
