

Frontiers of Large Language Models: Empowering Decision Optimization, Scene Understanding, and Summarization Through Advanced Computational Approaches

URL: <https://riunet.upv.es/handle/10251/202200>

Authors: [de Curtò, J](#)

Publication: [PhD Thesis]

Place Published: Universitat Politècnica de València

Thesis Supervisor: Carlos. T. Calafate

Palabras clave: [Artificial Intelligence](#), [Autonomous Systems](#), [Generative Adversarial Networks \(GANs\)](#), [Large Language Models](#), [Multi-Armed Bandits](#), [Semantic Scene Understanding](#), [Signature Transform](#), [Unmanned Aerial Vehicles](#), [Visual Language Models](#)
