

[A high-performance electromagnetic code to simulate high-temperature superconductors](#)

URL: <https://www.sciencedirect.com/science/article/pii/S0920379624001352>

Authors: [Soba, Alejandro](#) / [Fernandez-Serracanta, O](#) / [Lorenzo, J](#) / [Garcín, D](#) / [Houzeaux, Guillaume](#) / [Lamas, N](#) / [Granados, X](#) / [Mantsinen, Mervi](#)

Research Lines: [Computational Modeling for Fusion](#)

Publication: Fusion Engineering and Design

Volume / Pagination: 201 / 114282

Palabras clave: [Finite element analysis](#), [Fusion magnets](#), [H formulation](#), [high-performance computing](#), [High-temperature superconductivity](#)
