

[Sequence-to-sequence models for workload interference prediction on batch processing datacenters](#)

URL: <https://doi.org/10.1016/j.future.2020.03.058>

Authors: [Buchaca, David](#) / [Marcual, Joan](#) / [Berral, Josep Lluís](#) / [Carrera, David](#)

Research Lines: [Applied Learning Methods](#) / [Big Data Frameworks](#) / [Data-Center Optimization](#)

Publication: Future Generation Computer Systems

Place Published: Elsevier

Volume / Pagination: 110 / 115-166

Palabras clave: [deep learning](#), [Resource management](#), [Sequence-to-sequence](#), [Workload interference](#), [Workload placement](#)
