

[Worksharing Tasks: An Efficient Way to Exploit Irregular and Fine-Grained Loop Parallelism](#)

URL: <https://ieeexplore.ieee.org/abstract/document/8990523>

Authors: [Maroñas, Marcos](#) / [Sala, Kevin](#) / [Mateo, Sergi](#) / [Ayguadé, Eduard](#) / [Beltran, Vicenç](#)

Publication: 2019 IEEE 26th International Conference on High Performance Computing, Data, and Analytics (HiPC)

Place Published: IEEE

Pagination: 383-394

Palabras clave: [fine grained loop parallelism](#), [programming models](#), [runtime systems](#)
