## **High Programming Productivity for Accelerators**

## #pragma oss task device(oper #pragma acc kernels for (int y=ny0; y < nyf; y++) { for (int x=nx0; x < nxf; x++) { for (int z=nz0; z < nzf; z++) ...code...

Our main goal is to turn upcoming overwhelmingly-heterogeneous exascale supercomputers into manageable platforms for domain application developers.

## Summary

We work on programming models (OmpSs, OpenMP, OpenACC, CUDA, OpenCL, SYCL, OneAPI, etc.) and compiling techniques (such as JIT).

## **Objectives**

- Ease application development for accelerated HPC
- Influence standard bodies

Barcelona Supercomputing Center - Centro Nacional de Supercomputación
